

SAFE.

The IronGrip Eyedog automatically secures a wire rope sling for lifting pipe bundles or other stacks of goods without having personnel close by. It can be mounted on an unloaded sling which means a significant reduction of risks for injury.

Also the Eyedog allows you to have full control when releasing the bundle whether you do that on a hanging one or if it is put down. One single screw controls the release.

SUSTAINABLE.

Thanks to the working principle of the Eyedog, it does not compromise the sling. This means that the Eyedog as well as the sling can be reused.

The Eyedog is designed with heavy duty use in mind. It copes with bundles loaded on top of each other and the screw threads are protected from damage. Thus making it reusable over and over again.

ECONOMICAL.

The Eyedog is incredibly fast and easy to mount and dismount. It consists of one integral part and only one single screw is needed to attach the Eyedog to the sling wire.

The Eyedog can even be pre-fitted on the sling, making it even faster to put on sling and Eyedog on the pipe bundle. Once the sling is in place and attached to the lifting hook no more actions from rigging personnel is needed.

The Eyedog is a patented product.

Eyedog name	Wire dimension	Weight
ID-13	13 mm/ 1/2"	0.30 kg
ID-16	16 mm/ 5/8"	0.31 kg
ID-19	19 mm/ 3/4"	0.32 kg
ID-22	22 mm/ 7/8"	0.38 kg
